## PROJECTS

### TECH IT OUT!

- Front-end using React with a MongoDB back-end.
- A platform for those starting out on their coding journey. Users have free access to a library of helpful resources and a community where they can interact with other programmers.

**Deployed app:** <https://techtout-deploy.herokuapp.com/>

### WEATHER DASHBOARD

- A simple weather dashboard that allows a user to view the current and future weather conditions (5-day forecast) for any city.
- Uses the the OpenWeather Geocoding API & OpenWeather One Call API to fetch weather data.
- Built using HTML, CSS, and plain JavaScript.
